

VoxVote – The Voice of Your Audience

www.voxvote.com (September 2015)

What is VoxVote?

VoxVote is a live mobile voting platform. Adding interactivity to your presentations!

Created for and (professional) speaker presenting on stage. This stage could be indoor, outdoor, a classroom or any other location where there is a projection screen (beamer) and an internet connection for the presenter.

Audience:

The audience can vote anonymous with their smartphone, tablet or other connected device over the web.

How to start: (Quick Start Guide)

Prepare

1. Create an account on <https://designer.voxvote.com> - verify your email.
2. Prepare your questions and answers in a new VoxVote project. Set the correct answers if you use a quiz question.
3. Simulate your questions in preview mode. Then you get an impression how your charts will look like.
4. Edit your questions for fine tuning.

Live on stage

5. Share your PIN code (5 digits) with your audience, and let them interact with your presentation.

Let them navigate to <http://live.voxvote.com> or Apple users (iPad, iPod, iPhone) can download our VoxVote app from the AppStore or Google PlayStore

- start or stop questions, and refresh the chart with our VoxVote toolbar.
- ask the questions to the audience, and let them respond / vote.

6. Close the VoxVote project, archive the project. (After archive, you can't make any changes to your questions and answers. Update the question titles or typo's / sort order before archiving).

7. When archived, (After your conference day, or earlier), you can share the voting summary with your audience by using the 'Send Emails' button on your event. Empty questions will be skipped automatically.
